GRASSACCORD OPEN LIBRARY · STUDY FORMULA

Rooftop Fougère

Cool lavender and bergamot over sweet hay, soft flowers and a warm, powdery musk

FAMILY	BATCH	MATERIALS	BEST FOR
Fougère	1,000 parts	33	Fragrance · Shampoo · Body & hand wash

I Perfumer's Note

Late morning on the roof of a grand hotel: the pool lies still and turquoise, the cabana curtains barely move, and on the warm white marble someone has set a vase of fresh-cut lavender beside a single bergamot. The first breath is cool and splash-bright, bergamot, lime and lemon with a clean, cool freshness and a cold glint of juniper.

Then the lavender takes over, herbal and soft, warmed by marjoram and carried into a gentle bouquet of rose, lily of the valley, white jasmine and a fine violet powder. Slowly it settles on sweet dried hay, a shadow of moss, smoky vetiver, creamy sandalwood and a warm, powdery musk. Study how a fougère is built in two halves: a fresh herb above, a sweet hay below.

Licensed to Open sample · grassaccord.com
Free sample: share it unchanged, with credit to grassaccord.com.

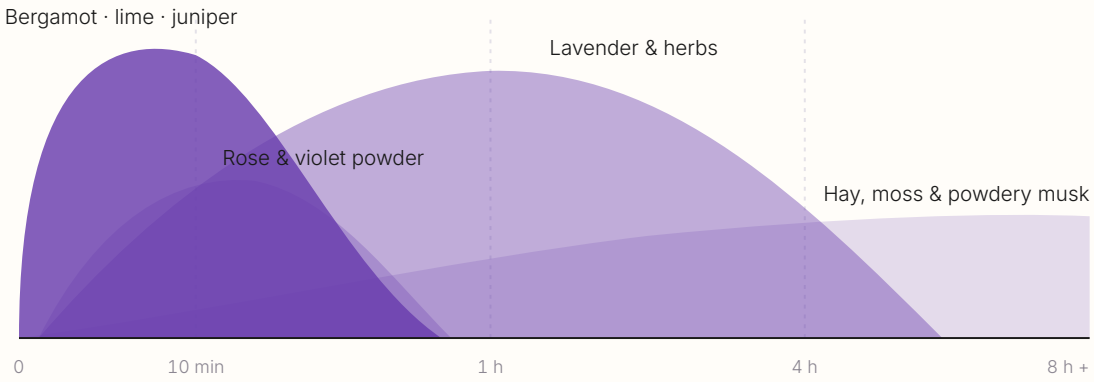
16.8%

The fougère skeleton takes 16.8% of the formula — lavender essential oil (10.3%) and its lavender-sharing molecules linalool, linalyl acetate and ethyl linalool (2.5%) above; coumarin (2.1%) with oakmoss and Evernyl (1.9%) below. It is a small share, yet it is what makes this a fougère: the citrus and flowers around it change the mood, but cool herb over sweet hay and moss gives the shape.

THE LESSON OF THIS FORMULA

II How It Unfolds

ON A BLOTTER



An illustration of the perfumer's note, not a measurement — times shift with dose, base and temperature.

III Suggested Dosage

Alcoholic fragrance · hydroalcoholic	15%
Shampoo · body wash · hand wash · rinse-off	1%

At these doses citral, benzyl salicylate, hydroxycitronellal, isoeugenol and musk ketone stay within their EU limits. On skin, use bergapten-free (FCF) bergamot and distilled lime; a cold-pressed bergamot at 15% would exceed the IFRA phototoxicity limit — see the last page.

IV Scent Structure

NEAT SHARE · 1 OF 2

Bitter citrus	Bergamot essential oil FCF	10.3%
Lavender	Lavender essential oil	10.3%
Violet powder	alpha-Isomethyl ionone	6.3%
Rounded lime	Lime essential oil distilled	6.2%
Clean rose	Citronellol	5.1%
Sweet peel	Orange essential oil	5.1%
Dewy lily	Hydroxycitronellal	4.9%
Jasmine base	Sampaquita Givco	4.9%
Fruity rose	Citronellyl acetate	4.1%
Orange blossom	Neroli essential oil	3.9%
Airy jasmine	Hedione	3.6%
Lemon zest	Lemon essential oil	3.0%
Powder musk	Musk ketone	2.9%
Warm herb	Sweet marjoram essential oil	2.9%
Dry hay	Coumarin	2.1%
Gin berry	Juniper berry essential oil terpeneless	2.1%
Creamy wood	Sandalwood essential oil	2.1%

Licensed to Open sample · grassaccord.com
Free sample: share it unchanged, with credit to grassaccord.com.

IV Scent Structure

NEAT SHARE · 2 OF 2

Smoky root	Vetiver essential oil	2.1%
Soft balsam	Benzyl salicylate	1.9%
Clean resin	Olibanum essential oil	1.9%
Clean lime	Dihydromyrcenol	1.5%
Clean musk	Galaxolide, 50%	1.0%
Lemon peel	Citral	1.0%
Dry moss	Evernyl	1.0%
Velvet wood	Iso E Super	1.0%
Fresh floral	Linalool	1.0%
Lavender citrus	Linalyl acetate	1.0%
Oakmoss	Oakmoss absolute	0.9%
Sharp green	Galbanum essential oil	0.6%
Soft floral	Ethyl linalool	0.5%
Pear rose	Geranyl acetate	0.5%
Clean musk	Exaltolide, 10%	0.21%
Carnation	Isoeugenol, 10%	0.12%

Bars show each material's own share. Two solutions are made in Hedione, which adds 2.97%, so the batch holds 6.57% Hedione in all; Galaxolide is used as sold, 50% in IPM.

VII How to Compound

1. Make the two solutions in Hedione and let them rest 24 h: Exaltolide and isoeugenol at 10% (1 g + 9 g Hedione). Galaxolide is weighed as sold, 50% in IPM.
2. Start with the slow base: musk ketone (warm gently until dissolved), coumarin, benzyl salicylate, sandalwood, vetiver and olibanum essential oils, oakmoss absolute, Evernyl, Iso E Super, Galaxolide and the Exaltolide solution.
3. Add the heart: lavender and sweet marjoram essential oils, alpha-isomethyl ionone, citronellol, hydroxycitronellal, Sampaquita Givco, citronellyl acetate, geranyl acetate, Hedione, neroli essential oil and the isoeugenol solution.
4. Add the fresh top: the bergamot FCF, distilled lime, orange, lemon, juniper berry and galbanum essential oils, citral, dihydromyrcenol, linalool, linalyl acetate and ethyl linalool.
5. Stir gently, seal, and let it rest 48 h cool and dark. For the fragrance, mix 15 g with 85 g perfumer's alcohol; for a shampoo, body wash or hand wash, add 1 g to 99 g of unperfumed base. Let it rest two weeks (fragrance) or a week (wash) before judging.

VIII Material Notes

Bergamot essential oil FCF (Citrus bergamia)

Natural essential oil · CAS 8007-75-8

Bitter-sweet citrus with a tea-like, floral side. At 10.3%, one of the two largest lines, it is the cool first breath on the terrace. FCF means the furocoumarins have been removed; a cold-pressed bergamot at this dose would exceed the IFRA phototoxicity limit on skin.

grassaccord.com/ingredients/bergamot-essential-oil

alpha-Isomethyl ionone

C14H22O · 206.33 · CAS 127-51-5

A soft violet and orris powder with a woody edge. At 6.3% it dusts the flowers like a fine talc on warm skin. An EU-listed allergen.

grassaccord.com/ingredients/alpha-isomethyl-ionone

Citronellol

C10H20O · 156.27 · CAS 106-22-9

A fresh, clean rose with a geranium-leaf side. At 5.1% it is the main rose of the heart, crisp rather than jammy. An EU-listed allergen.

grassaccord.com/ingredients/citronellol

Hydroxycitronellal

C10H20O2 · 172.27 · CAS 107-75-5

A soft, dewy lily of the valley. At 4.9% it keeps the heart fresh and moist, like flowers just watered at dusk. Restricted and an allergen in the EU.

grassaccord.com/ingredients/hydroxycitronellal

Lavender essential oil (Lavandula angustifolia)

Natural essential oil · CAS 8000-28-0

Clean, herbal lavender with a soft floral sweetness. At 10.3% it is the backbone of the formula, the classic lavender that every fougère is built around.

grassaccord.com/ingredients/lavender-essential-oil

Lime essential oil distilled (Citrus aurantifolia)

Natural essential oil · CAS 8008-26-2

Distilled lime: rounder and sweeter than the pressed oil, close to a lime sweet. At 6.2% it widens the cool citrus opening. Distillation leaves the furocoumarins behind, so it carries no phototoxicity limit.

grassaccord.com/ingredients/lime-essential-oil

Orange essential oil (Citrus sinensis)

Natural essential oil · CAS 8008-57-9

Sweet, juicy orange peel. At 5.1% it softens the bitter bergamot and the lime with a warm, round sweetness.

grassaccord.com/ingredients/orange-essential-oil

Licensed to Open sample · grassaccord.com
Free sample: share it unchanged, with credit to grassaccord.com.

VIII Material Notes

Sampaquita Givco

Jasmine base · mixture · IFRA certificate from the supplier

A ready-made sambac jasmine base, deep and a little fruity. At 4.9% it gives the floral heart its white-flower depth. Check its IFRA certificate for the dose you use.

grassaccord.com/ingredients/sampaquita-givco

Neroli essential oil (Citrus aurantium flower)

Natural essential oil · CAS 8016-38-4

Fresh orange blossom with a green, bitter side. At 3.9% it is the bridge from the citrus peel to the flowers.

grassaccord.com/ingredients/neroli-essential-oil

Lemon essential oil (Citrus limon)

Natural essential oil · CAS 8008-56-8

Bright, sparkling lemon zest. At 3.0% it sharpens the first minutes into a clean, splash-on freshness.

grassaccord.com/ingredients/lemon-essential-oil

Sweet marjoram essential oil (Origanum majorana)

Natural essential oil · CAS 8015-01-8

A warm, slightly camphorous herb, gentler than thyme. At 2.9% it gives the lavender a sunny, herbal warmth.

grassaccord.com/ingredients/sweet-marjoram-essential-oil

Citronellyl acetate

C12H22O2 · 198.31 · CAS 150-84-5

A light, fruity rose with a citrus lift. At 4.1% it carries the rose up into the opening so the two meet early.

grassaccord.com/ingredients/citronellyl-acetate

Hedione (methyl dihydrojasmonate)

C13H22O3 · 226.32 · CAS 24851-98-7

A sheer, transparent jasmine. At 3.6% on its own line, and 6.57% in all with the two solutions made in it, it is the open air of the terrace that lets the lavender breathe.

grassaccord.com/ingredients/methyl-dihydrojasmonate-hedione

Musk ketone

C14H18N2O5 · 294.31 · CAS 81-14-1

A warm, sweet, powdery musk, the classic warm musk of a gentleman's fougère. At 2.9% it is the soft, lasting skin of the drydown. Restricted in the EU.

grassaccord.com/ingredients/musk-ketone

Licensed to Open sample · grassaccord.com
Free sample: share it unchanged, with credit to grassaccord.com.

VIII Material Notes

Coumarin

C9H6O2 · 146.14 · CAS 91-64-5

Freshly dried hay with a tonka and almond sweetness. At 2.1% it is the other half of the fougère idea: lavender above, hay below. An EU-listed allergen.

grassaccord.com/ingredients/coumarin

Exaltolide (pentadecanolide)

C15H28O2 · 240.39 · CAS 106-02-5

A fine, round musk with the smoothness of clean skin. Used as a 10% solution (0.21% neat), it polishes the finish.

grassaccord.com/ingredients/exaltolide

Juniper berry essential oil terpeneless (Juniperus communis)

Natural essential oil · CAS 8002-68-4

Cool, resinous juniper, the smell of gin; the terpeneless grade is cleaner and lasts longer. At 2.1% it adds a cold, piney glint to the opening.

grassaccord.com/ingredients/juniper-berry-essential-oil

Sandalwood essential oil (Santalum album)

Natural essential oil · CAS 8006-87-9

A creamy, milky wood. At 2.1% it is the smooth wooden rail the drydown leans on.

grassaccord.com/ingredients/sandalwood-essential-oil

Vetiver essential oil (Vetiveria zizanioides)

Natural essential oil · CAS 8016-96-4

Earthy, smoky roots with a dry, woody edge. At 2.1% it gives the base a dry, masculine floor.

grassaccord.com/ingredients/vetiver-essential-oil

Galaxolide (hexamethylindanopyran)

C18H26O · 258.40 · CAS 1222-05-5

A soft, clean, laundered musk. Used as sold, a 50% solution in IPM (1.0% neat), it adds a fresh-towel softness to the musk ketone.

grassaccord.com/ingredients/galaxolide

Benzyl salicylate

C14H12O3 · 228.25 · CAS 118-58-1

Almost odourless alone, a faint sweet balsam. At 1.9% it is the cushion that holds the flowers and herbs on the skin. Restricted and an allergen in the EU.

grassaccord.com/ingredients/benzyl-salicylate

Licensed to Open sample · grassaccord.com
Free sample: share it unchanged, with credit to grassaccord.com.

VIII Material Notes

Olibanum essential oil (Boswellia carterii)

Natural essential oil · CAS 8016-36-2

Frankincense: a clean, lemony resin with a cool, churchy smoke. At 1.9% it adds a quiet, airy resin between the herbs and the woods.

grassaccord.com/ingredients/olibanum-essential-oil

Isoeugenol

C10H12O2 · 164.20 · CAS 97-54-1

A sweet, smoky carnation spice, very strong. Used as a 10% solution (0.12% neat) to stay within its EU limit, it is a single thread of spice in the flowers.

grassaccord.com/ingredients/isoeugenol

Evernyl (methyl atrarate)

C10H12O4 · 196.20 · CAS 4707-47-5

A clean, dry oakmoss note from a single molecule. At 1.0% it shares the work of the oakmoss absolute so less of the natural is needed.

grassaccord.com/ingredients/evernyl

Dihydromyrcenol

C10H22O · 158.28 · CAS 18479-58-8

A clean, metallic lime freshness. At 1.5% it gives the citrus a crisp, cool, modern clarity.

grassaccord.com/ingredients/dihydromyrcenol

Citral

C10H16O · 152.24 · CAS 5392-40-5

Bright lemon peel and lemongrass. At 1.0% it is a short sparkle at the start. Restricted and an allergen in the EU.

grassaccord.com/ingredients/citral

Iso E Super (tetramethyl acetyloctahydronaphthalenes)

C16H26O · 234.38 · CAS 54464-57-2

A smooth, velvety woody amber. At 1.0% it widens the sandalwood and vetiver into a soft glow. An EU-listed allergen.

grassaccord.com/ingredients/iso-e-super

Licensed to Open sample · grassaccord.com
Free sample: share it unchanged, with credit to grassaccord.com.

VIII Material Notes

5 OF 5

Linalool

C10H18O · 154.25 · CAS 78-70-6

A light, fresh floral between lavender and lily. At 1.0% it smooths the lavender into the flowers. An EU-listed allergen.

grassaccord.com/ingredients/linalool

Linalyl acetate

C12H20O2 · 196.29 · CAS 115-95-7

Fresh and sweet, between bergamot and lavender. At 1.0% it joins the two into one smooth opening. An EU-listed allergen.

grassaccord.com/ingredients/linalyl-acetate

Oakmoss absolute (Evernia prunastri)

Natural absolute · CAS 90028-68-5

A deep, damp forest moss with an inky, leathery side. At 0.9% it is the shadow under the hay. Use only a low-atranol grade.

grassaccord.com/ingredients/oakmoss-absolute

Galbanum essential oil (Ferula galbaniflua)

Natural essential oil · CAS 8023-91-4

An intense, bitter green, like a snapped stem. At 0.6% it is a single green line across the herbs.

grassaccord.com/ingredients/galbanum-essential-oil

Ethyl linalool

C11H20O · 168.28 · CAS 10339-55-6

A softer, rounder linalool. At 0.5% it smooths the edges of the lavender.

grassaccord.com/ingredients/ethyl-linalool

Geranyl acetate

C12H20O2 · 196.29 · CAS 105-87-3

A fruity rose with a pear-like softness. At 0.5% it is the light, fresh rose of the heart, joining the citrus to the citronellol.

grassaccord.com/ingredients/geranyl-acetate

Licensed to Open sample · grassaccord.com
Free sample: share it unchanged, with credit to grassaccord.com.

IX Allergen Check

EU

LISTED MATERIAL	IN CONCENTRATE	FRAGRANCE 15%
Lavender essential oil	10.3%	1.545%
Bergamot essential oil FCF	10.3%	1.545%
alpha-Isomethyl ionone	6.3%	0.945%
Citronellol	5.1%	0.765%
Orange essential oil	5.1%	0.765%
Hydroxycitronellal	4.9%	0.735%
Lemon essential oil	3.0%	0.45%
Coumarin	2.1%	0.315%
Sandalwood essential oil	2.1%	0.315%
Benzyl salicylate	1.9%	0.285%
Citral	1.0%	0.15%
Linalool	1.0%	0.15%
Linalyl acetate	1.0%	0.15%
Oakmoss extract	0.9%	0.135%
Hexamethylindanopyran (Galaxolide)	1.0%	0.15%
Tetramethyl acetyloctahydronaphthalenes (Iso E Super)	1.0%	0.15%
Geranyl acetate	0.5%	0.075%
Isoeugenol	0.12%	0.018%

EU thresholds: 0.001% in leave-on products, 0.01% in rinse-off products. In a 15% fragrance every row goes on the ingredient list; in a 1% wash only rows at 1% or more in the concentrate do. The essential oils (lavender, bergamot, orange, lemon, lime, neroli, marjoram) and the Sampaquita Givco base also carry limonene, linalool, citral, geraniol and other listed allergens of their own — take these from the supplier's data.
